

## Electro-Magnetic Locks

*Code: SLM/ZL*

EM | Slimline Bracket | ZL

Deedlock by CQR Electro-magnetic Locks have been tested to the performance technical standard TS010 and now have 26% more holding force than our previous models and are 50% stronger holder force than our nearest competitors. The electro-magnetic locks can be mounted in a variety of applications with the use of a range of brackets designed specifically for the magnet. These face to face electro-magnetic locks are suitable for a range of applications used in conjunction with either access control systems or an audio / video entry system. The electro-magnetic locks have a kick off pin in the armature plate to overcome any residual magnetism when power to the magnet is turned off.
